

Critical Incident Stress Management

CISM

Certificate NFQ LEVEL 8
(10 credits)

Programme aim

The aim of this programme is to provide learners with an awareness of workplace critical incident stress and to develop key competencies, skills and knowledge in the field of managing and responding appropriately to critical/traumatic incidents across a wide and diverse range of occupational contexts

The programme, which incorporates ICISF Individual and Group Crisis Interventions addresses the important issue of protecting the psychological health and safety of workers in occupational groups likely to be exposed to critical incidents during the course of their work in compliance with national policy.

Our CISM module can be delivered "in house" for organisations that wish to implement a Psychosocial CISM Peer Support system for their staff fulfilling national policy (Work PositiveCI - Health and Safety Authority, State Claims Agency & CISM Network Ireland).

Programme details

- The History of CISM
- Legal Imperatives on employers
- Psychosocial Risk assessment
- Research Context for variety of occupational groups
- Key CISM Interventions and Core Components

International Critical Incident Stress Foundation (ICISF) Individual and Group support interventions:

- Psychological crisis and psychological crisis intervention
- Evidence-based practice
- Common psychological and behavioural crisis reactions
